

## Mosab Hassan Yousef Exposes the Root of Radical Islam

<https://www.youtube.com/watch?v=h3Onij7QTy8>

17 mín.

Oh I know that the Jewish slaughter on the hands of Muslims has been going for approximately 14 centuries and for some reason the Jewish people are in denial I understand why because the Jewish people admit that then they will have to confront a majority of Muslims and this is why we are at defense right now

from the early beginning of the war and prior to the war I came to realize that the ideological dimension of this war cannot be ignored and I got cancelled many many years ago some 15 years ago when I start criticizing and questioning the scripture in Islam that encourages Muslims to harm and kill Jewish people.

And I think the Jewish people are a very peaceful nation, that does not look to harm the Muslims, but at least I think that we have the right - you have the right to question and say, say: „What's going on here, why the scripture is inciting against the Jewish people and what the world is doing about it?“

What other major religions is doing about it and this is why I changed my strategy that this is not only about Palestine. Palestine is non-existential it's just a device that the Muslims use to as a weapon against Israel and as a weapon against the Jewish people fundamentally

Muslims think that Allah hates the Jewish people and how can they love the Jewish people if their God that they bow 20 times a day hits the Jewish people?

so I am not here to speak against the Muslims but I want you to be aware of this fundamental problem at least in your subconscious like you need to have this somewhere that we have an existential threat and now you see it in reality

how they were able to just turn the narrative against Israel in no time and this is why from the beginning of the war I said Muslims you have to back off this is not acceptable to take the side of of a terrorist group that just committed a genocide a capital crime unforgivable crime by the name of resistance and by the name of occupation colonialism Etc not acceptable

and now we have hundreds of millions of Muslims and Arabs spreading propaganda and as you see when people see it thousands of times per day they start believing in it it becomes real so it is the time to move from defense to offense to call things for what they are to see them for what they are and there is no need to be afraid

there is no need for us to be depressed I have been fighting against Islam alone by myself for so many years and I don't need the permission from nobody if they want me to cease to exist this means that I have to fight for my life and you are in the same position right now

I'm not calling for a religious War there has been a religious war and it's about time to wake up I'm not saying that we go on a war with the Muslim people but at least we need to educate the rest of the world that we are in danger

some people out there hundreds of millions of them **want us dead and and we have to defend ourselves** Hamas is not only acting on their own they belong to the Muslim Brotherhood the Muslim Brotherhood belongs to a religion and that religion has a scripture and it's about time to open the books for the rest of the world

the majority of the world are with the Jewish people Hinduism they understand the Islamic Danger Buddhism Buddhists Christians and it's about time we need some help from the big majority religions to stand with us because this is existential fight

and if we don't win it is going to be a disaster the whole globe is going to go into chaos I did not mean to talk about Islam this much but in my opinion Palestine the Palestinian Authority the PLO Hamas Islamic Jihad the Muslim Brotherhood all of them are inspired by the same death cult

yat was a Muslim Brotherhood Abdullah aam was a Muslim Brotherhood Badin was a Muslim Brotherhood Hamas Muslim Brotherhood all of them are Muslim Brotherhood so we have a big problem that we need to wake up and if we don't keep ignoring and denying the existential threat then we will have to face it

eventually when it's too late Palestine depends on the destruction of Israel if there is any definition of Palestine it means the absence of Israel this is what Palestine is and now they got legitimacy somehow but you ask him the question what is Palestine is it an ethnic group is it a religion is it a distinct language?

do you have scripture are you a nation where you a country none of that so what is Palestine and what is the purpose of Palestine?

so for those who are representing the two-state solution and I try to conclude they want Israel to cease to exist or they are not aware of this existential threat because in my opinion Hamas is a small threat comparing to the Palestinian Authority all this Global chaos is managed by the Palestinian Authority by the PLO it's not Hamas propaganda is the one who sits in ramala pay all the advocates worldwide

through their embassies those are the ones who are fighting against Israel's uh legitimacy so we need also to be aware of this uh big problem there is no way for Israel I just came uh back from Israel and I know the Israeli Street vibe I met with thousands of people on the street I talked to so many people and nobody can afford a pales state that i hostile uh to Israel what happened in October 7 cannot be ignored

and I have been warning against this this issue you cannot give them Judea and Samaria you cannot give them the mountains you cannot sacrifice the Jordanian Valley this is a defense line and I speak from security point of view you see I speak now like a right-wing uh ex Jewish extremist but this is my understanding

look I have 10 years of counter terrorism experience on regular basis we are dealing with explosions suicide bombers it the situation was out of control this is my background and I when I think I think uh with a security background and we cannot afford the masses of

Arabians just invading breaking the fence and all of a sudden what is that 10 mile what's nine miles Israel's wasted 9 miles at Tu and up to this point the Palestinian Authority has sponsored terrorism

they encouraged terrorism yat was a terrorist I was in his meeting when he gave my father the authority to blow up buses markets beaches during the second Palestinian intifada it was the piece of information that I gave to the Israeli shinb that was provided to the United Nation to condemn yasat as a terrorist

I was in that meeting and we are talking we are talking about we are talking about a con artist Egyptian K artist that is the father of the Palestinian cause so now we are dealing with an ideology Palestine is not a country it should not get more legitimacy because it's only an ideology and this ideology need to be countered

as long as the false narrative is there it will keep rolling like a snowball and we will have to deal with the consequences so now I agree with them that our strategy should shift from defense to offense we need to expose the force narrative and when the world understand that there is no such thing as Palestine that is just a false narrative

and the Palestinian entire narrative is the victim narrative that has nothing to do with reality self-inflicted pain this is what they've been doing they brought themselves here they brought the whole world here it's not Israel's responsibility once we are able to mobilize Hollywood journalism everybody to bring the truth of this scam political scam

then we may have a better chance to communicate with this people but as long as they are living in this fantasy we we are not able to communicate with them we are not able to please them or satisfy their ambition because it's a black hole

you give them East Jerusalem tomorrow then they are going to say we want West Jerusalem if you give them the 1967 they are going to say I want the whole thing and they will continue to be a hostile so now we are we are in trouble it's a big problem

it is a big problem so is there a solution and then I we've been discussing this yes there is a solution but first of all we have to get anchored in the truth and face reality face things as they are as long as we try to escape it we are not able to provide uh a good solution

for this problem there are Arabs I don't think that they're Palestinians they're just carrying a false identity around we we are not Palestinians when I was born I had a Jordanian birth certificate as millions of the people who were born there so first of all we need to ask the people what makes you a Palestinian

you are Arab this is your ethnicity and I don't think there is a problem between Arabs and Jews to get along we have 2 million Arabs in Israel even though I'm not sure about their loyalty and this is something also need to be taken into consideration what we need we need a solid police force we don't need 40 or 50,000 armed uh militia with clashing Coes all ove the place protecting the governing Authority

what do I want to do with all this so first of all we must disarm the Palestinian Authority we don't need so many guns we need a police force that is not corrupted that can keep order for the Palestinians then it can assure Israel security Mahmud Abbas will die sooner or later the man is at the edge of collapse and everybody is counting on Mahmud Abbas what's the day after Mahmud Abbas who's going to rule the show who's going to be the player

they are conflicted people so count on the Palestinian Authority is a form of insanity this is for the people who just like putting their head in the sand they're not realizing we are biting on a dying thing actually it's already dead so we need to find an alternative and what we need we need a police force

and by the way my wild opinion let Arab rule Arab how about mandatory recruitment to the Arabs to the Israeli Arabs to rule the Arabs in the West Bank one solution okay not so many enthusiasm for this but Arabs Arabs know how to deal with Arabs it's not Israel's fault to manage the uh Arab Madness if it's not that it could be the Jordanian intelligence it could be the Egyptian intelligence it could be a confederation with Jordan with Egypt it could be whatever but not the inane Authority as is today

this arrangement I don't like because they are deceptive they are double-faced they are untrustworthy and they are hostile to Israel wherever they go with that said we need an alternative and I think there is a possibility of a loyal responsible force in the West Bank that will take care of the security not only of the Arabs of Judea and Samaria but also of the the Jewish State

security needs this is on one hand on the other hand economy the world has been investing so much money into the Palestinian Authority and look at their operation worldwide embassies delegations ambassadors how much is that budget the annual budget only to pay for the Palestinian Authority ambassadors and their honour instead of all this the Arabs the West Bank don't need all this money

spent hundreds of millions of dollars on nonsense we could have directed that money to build the economy for the generation in the West Bank and this is where we need to shift strategy then education education I'd start with educating the Arabs of the West Bank on the Holocaust this should be mandatory for every Arab to learn to learn from the Jewish experience that never be a victim

to rise above pleasure to rise above pain this is the model that inspired me but to stay a victim in victimhood this is not acceptable so Palestine is not going to solve The Human Condition in the West Bank it is not going to solve the problem actually it's creating more problems

with that said we need to really have a deep look into the situation and be honest with ourselves is this serving the Arabs is this serving the Jews is this securing the future of the generation or not then after that we make our decisions than you and I appreciate your uh patience

## Is Peace Possible in Islam? Mosab Hassan Yousef's Bold Perspective

[https://www.youtube.com/watch?v=6vUVVEQP\\_yU](https://www.youtube.com/watch?v=6vUVVEQP_yU)

24 mín.

Viðtal í London eftir Oxford University málstofu (debate) um tilvist Ísraels.

Birt 29. des. 2024: In this segment of a powerful interview, Mosab Hassan Yousef reflects on the challenges and complexities surrounding the idea of peace in Islam. As the son of a Hamas co-founder and someone who has lived through intense personal and ideological struggles, Mosab shares his perspective on religion, freedom, and the possibility for transformation.

This discussion, part of his conversation with Jonathan Sacerdoti following their appearance at the Oxford Union, delves into the philosophical and spiritual questions Mosab has wrestled with, offering a unique and deeply personal viewpoint.

Watch as Mosab explores the contrasts between conflict and peace, and what it will take to foster understanding in a world often divided by ideology and history:

Jonathan: You did tweet the other day about um Islam and Muslims and you said something that I think people found quite shocking um could you talk a bit to that and and particularly again the distinctions as you see them between Muslims Arabs Palestinians Hamas Palestinian Authority fat these are all um they have overlap and you say that Hamas is motivated by power and money and Corruption but is it not also motivated by Islam and uh belief in in the rules and laws of Islam as you said

Mosab Hassan Yousef, á tímasetningu 0:40.

As someone who studied the Islamic law and the classic Arabic memorized um huge parts of the Quran. I know what's required from Muslims to be a Muslim so when I put hypothetical questions and very offensive uh considered offensive let's say by some people

I'm trying to help the people to think even though I know I I get lots of hate from that, but to be accused of islamophobia this is absurd why there is a death sentence over me and uh the people don't understand how it feels like when you are sentenced to death by a belief system

in this case the belief system is Islam it's not Christianity it's not Judaism and I don't need to compare it with any other religion I'm familiar with the major religions I have studied them in fact I have practiced them let's put this on the side

when it comes to my problem with Islam I have been sentenced to death according to this belief system so how could I be phobic about it is it a matter of phobia or a real concern that some people want me dead based on their belief and how I'm going to defend myself I'm fighting for my life also this is existential fight that most people don't understand

how it is like to be sentenced to death for no crime that he committed. What I did I was born in a Muslim family then down the road when I choose not to be a Muslim I was given three days to return to Islam 3 days and if I don't come back to Islam I would be killed this is my reality this is the belief that we are dealing with now what most people especially the Liberals don't realize that in fact before the Muslim Brotherhood uh came uh to uh light and start catching momentum in in the uh back in the 1940s and 50s and before the Islamic revolution in Iran we did not have Islam

Islam was over after the collapse of the otoman Empire it was nationalism it was the night life it was the movie theaters people were just having fun there was no violence women did not have to dress up ER like garbage bags moving around uh they had a lot more freedom and we did not have violence most importantly islamists taken over the entire region by their indoctrination their hatred uh once by the name of the Afghan occupation the Iraqi occupation then the Palestinian occupation and they can go on and on for eternity because they don't need a reason to be violent they can just uh create fiction and act on it

So I think this can be reversible can be reversed we can go to the point where you know just people um they can choose the identity they want I don't have problem with it but now to identify as a Muslim uh against your values this is not acceptable

for example many Muslims are not jihadists they will not kill Jews they will not kill Christians in fact they want to get along they want to do business with the Jewish people with Christians and just open up uh that's the vast majority of the Muslims but they still identify with the belief system and this is where they get conflicted this is their confusion is very evident to me as someone who lived in that belief system and I say you don't believe in any of the values you oppose all the values of Islam but you still identify as a Muslim that's a problem uh and what makes you a Muslim and if you are doomed to a Hellfire according the Islamic laws then why don't you fight for yourself or the religious identity is just only giving them U protection status community respectability it's uh it's their face and it's part of my uh work to challenge this people ER

yesterday I was hanging out all day long uh with Muhammad uh he came with us all the way to the event and he's aware and I choose him and we had an amazing conversation Muhammad is a Pakistani he's very respectful person he understand his responsibility in the UK he pays his taxes and he understands if he does not respect the laws and the values of this culture it's going to turn into another Pakistan and he sees it happening and going in that direction

this is what Muhammad told me yesterday and by the way he told me: „I pray five times a day“ Then I asked him: „Are you a Muslim?“ Did Muhammad even intend to establish Islam? Was Muhammad a Muslim? Because the Islamic belief system was developed way after the death of Muhammad and we don't know if Muhammad ever existed, but then let's say if he did exist and he comes today to fight against the conceptions of Muslims and their Idol worshipping uh of gods that they project on their own images what will they do to

Muhammad. Do you think they will even listen, listen to Muhammad? They would tell him: „you know you're not the real one.“ um So this is the human delusion that we are dealing with now. I'm not concerned of the liberals who uh uh who accuse me of things try to discredit me is their business on the long uh run uh people will understand my uh mechanism how I work in Reverse Psychology. I'm not trying to create um uh controversy to gain followers. I don't like followers.

Jonathan: you're doing quite well though that.

Mosab Hassan Yousef: Think about it whatever but this is more of a reverse psychology and the more we have, the Muslims think.

I think they have the potential just like any other uh people and also they - the Muslims need to ask themselves if Islam they ethnicity or not, because it's just a belief system. Well Islam isn't an ethnicity is it.

Jonathan: It's it's a belie system and ideology a religion a philosophy, but it's not an ethnicity yeah it's **not even religion actually it's a totalitarian system uh because religion is going in the opposite direction of the material.**

Mosab Hassan Yousef: If I had to look at most of **the main religions in the world** there is there is renunciation of the material and going towards the spiritual you see the monks the nuns uh the yogis uh people who just withdraw from the material and go into the other side. **Islam is going in the opposite direction of religion.**

Jonathan: How do you mean?

Mosab Hassan Yousef: uh it's about dominating the material it's about uh constructing the Islamic the Empire **the only Empire on the rubble of civilization** where there's going to be only one Islamic leader one not two - **One Islamic leader that rule - Rule the universe**

So this is very very dangerous and there it does not show lots of spirituality! Especially when it's by the means of **the gun** or by the means of **the sword** where **slavery** is acceptable where uh ER **taking territory** and **uh forcing people to submit to their belief system** these are very **direct and serious violations** of the way of of evolution. The way of life the Universal life.

Jonathan: so why do you think it is because Islam is growing as a faith people are converting to it. What do you think attracts them?

I mean, I remember reading the Quran the first time and I could understand why maybe at the time it was written. The promise of water running under your feet and fruits and uh in the land in the world to come was appealing to a people who didn't have any of those things easily but today we have all of those things at our fingertips

Mosab Hassan Yousef: Look since the uh Industrial Revolution uh the people in the west went towards the material and **I think material without spiritual uh can lead to void** and I I think Christianity uh the Christian model of a savior that died on everyone's sin on behalf of everyone sense um has made so many people dependent in that religion even though it's it's

a very nice uh practice and I like that uh love the enemy turn the other cheek tolerance forgiveness

There are very very important concepts for those who are trying to grow out of Darkness come to a higher state of consciousness why I I empower I don't go against it but at the end of the day they still dependent on hypothesis and uh I think Christianity did not answer uh the spiritual need of uh westerners as uh a main religion this why there is a setback or there is uh Christianity is shrinking in the west so now people still in the need for a spiritual what would be the alternative many people uh travel towards yoga towards Buddhism towards Hinduism which like basically also amazing practices

um Islam for uh the vast majority who are looking for legislation they want the guidelines it's coming spirituality, but it's also a political system at the same time uh and they feel comfortable there because they just basically have to follow the order: one, two, three! Do it and this is going to guarantee them a community uh superiority, righteousness and a place in heaven in a paradise in the after life, **this what gives people comfort** in the face of death when they are afraid what's going to happen next

And uh especially those who are broken coming from void the void of the material uh with no satisfaction they haven't realized how it works so Islam attracts the vast majority and the vast majority they don't have the uh ER they're not at the level of **taking the risk of walking alone** ER of coming to realize uh their potential **most people just want to be told what to do**

And if there is a belief system that is going to uh uh be „my comfort“ uh this is where most people choose but this people eventually especially if they're coming from Western background it takes almost no time before they depart Islam again because they come uh attracted by the fancy ideas of mostly um represented as the solution for life and for the human suffering **they realize sooner or later that they are surrounded by unconscious and dangerous people**

Who don't have uh regard ER to uh anyone's Freedom so and also don't underestimate that Muslims are close to one it's 20% of the population on Earth are Muslims that's one out of four even though I guarantee you a very small percentage of them understand the what they supposed to do uh in Islam.

They're just nominal Muslims so this also people need help and a I don't mind if this is their choice finally their choice as long as they're not going to turn violent and start uh uh launch war against other religions or religious uh minorities

Jonathan: so this touches on the idea of extremist Islam or islamism politicized Islam And Islam - and I sense from you that you believe that those people who are moderate Muslims who you say don't want to kill Jews uh don't want all of those listed.

Mosab Hassan Yousef: Exactly.

Jonathan: um don't want to kill you hopefully um that they are not actually Muslims is what you've said in the past. Because what they believe they're subscribing to - they're actually ignoring the fundamental tenants of that faith and ideology is that basically what you're saying that that you're not really a Muslim if you're not subscribing to the killing of Jews the killing of mosab the killing of apostates

Mosab Hassan Yousef: Right killing beheading uh cutting people's uh arms uh beheading people in public places for adultery or for uh treason or for opposing the ruler or like what they do in Saudi Arabia ER stoning women

You ask any you ask 90% 95% of the Muslim population or those who identify as Muslims do you agree to any of these barbaric practices of 7th Century they say no, but are you a Muslim they say yes so you come to realize they identifying with something that they completely and totally oppose but it's their only identity they have and this is where um most or the majority of a Humanity identify with something that they are not because they don't have identity.

Uh they don't have status they don't have security they don't have relationship uh they cannot build a family. Family H and everybody has the right to choose where to be H but is this everything about life and when we reach a point where we have the attempt of um a minority within the Muslim world?

Look at Hamas small group in comparison to hundreds of millions of Muslims and to see their atrocities against the Jewish minority and instead of opposing them to say this does not represent us what they did? They did the opposite they legitimized Hamas they advocated on behalf of Hamas

And they have been working around the clock to delegitimize Israel they have been working around the clock to portray Hamas as Freedom Fighters and if you question that they will actually attack you, they could attack you so this is the situation we we are doing the hypocrisy and what I would like for them to Simply uh be truthful to who they are if this is not who you are you're not capable of killing

Yeah but you still identify with such a dangerous ideology then we we need we need somehow to know where do do you stand? Where do you stand morally?

Jonathan: So do you believe those people should leave Islam?

Mosab Hassan Yousef: They are already out of Islam they are already out of Islam in the sense that it would kill them too

It's yeah and based based on their uh practice on their lifestyle the life that they lead they're condemned to hell.

Jonathan: To make a moderate enlightened Islam you know there are people who argue for example that other religions older religions have been through a process of modernization um but is it? Is it the case that basically Islam because of its fundamental belief that Muhammad is the last prophet, um that you know there is no interpretation effectively of

the texts and the rules Beyond a certain point is that what is the fundamental stopping point for that happening or do you think there is a way it could moderate over time?

Mosab Hassan Yousef: Well I'm about to publish a book uh called „The Last Prophet“ it's a very positive account of the life of muhammad it's, it's a novel, so it's out of my imagination and when you put Muhammad in the context of his environment you respect him, but you need to put him in the context of his environment. You cannot just bring him to the 21st century and say: I want this model or you try to judge him by the values uh of the 21st century.

Um and I may respect Muhammad I may respect him, but you tell me a Muslim it's like a carbon copy of Muhammad that I really don't have lots of respect because what's so original about you being just a Muslim uh if you to tell me: I am Muhammad you know or I am Jesus or I am Buddha then or I'm mahavir or Lau? Or name them! All the avatars of all time, they were original, they created something original.

Even though people can argue that Muhammad did not create something original but at least he went against the flow of his Society. Against The Establishment, he fought for women's right to exist and he fought against conceptions of the Divine, the same disease that is actually dominating the Muslim world today, is the problem of conceptions, that there is not even one form of Islam. Millions of layers on the top of each other and all of them contradictory.

This is sh, this is Sunni, this is wahhabi, this is alawi, this is Ahmed, this is, is this is and just salafi, salafi jihadist and salafi non- jihadist, Muslim Brotherhood and we can go for forever uh and it's not a one thing very similar to Palestine and Palestinian, that could be the Communist, the islamists, the uh Marxist, the and **all of them, oppose each other.**

But they find a common enemy that this is their anchor uh uh uh in existence so this brings us back to The Human Condition and this is where I try to deal with the problem at this very basic level human: Delusion, lust, hatred, um anger you know. Why people are angry and why are they uh being offended, when I question them say it's like yes Muslims. I don't trust Muslims.

Well how can I trust the if you don't trust yourself the problem with people who uh represent themselves as Muslims why did they have the need to represent themselves as Muslims?

You know the most advanced spiritual Muslim sect, who don't identify as Muslims those are **the sufis** they would never reveal who they are to public. They're very quiet they're in silence they're very powerful they are masters of life and you know what they do very simple jobs they could be just literally cleaning cleaning houses or driving cars uh doing very simple gardeners and this is what they love to do and they are Masters of the Universe and they never reveal themselves to anybody.

This people are leg legitimate, I bow, I respect, they inspire me, cuz they don't have the need to say I am something or I'm somebody?

But the others who are just in a race to show uh who's the better Muslim, uh these are the ones I'm worried about, because they really needed that uh identity to uh push certain agenda.

Or I know that they have expectations now from posing ER like that, so this is people who basically anybody who identify as a Muslim and I can't say it actually uh comfortably and I don't mean to offend anyone. They haven't grown up yet! They are still uh at the very basic level of uh Consciousness and they should not be offended.

They actually instead of being angry with me, they need to start ask themselves: What makes them Muslims and why is that very important to them and why do they have to uh move in a uh big group of people? Can they move just alone?

I highly recommend for these people to leave the group - the group and to get out of the herd and the herd mentality, because usually **the herd is following a shepherd and you know what happens to the Shepherd that is following the herd. – Enthusiast, enthusiastically! to the slutter house!**

## **Mosab Hassan Yousef EXPOSES the SHOCKING Truth About Islam That NO ONE Dares to Admit**

[https://www.youtube.com/watch?v=3uEXC\\_M8vWs](https://www.youtube.com/watch?v=3uEXC_M8vWs)

13:45 mín.

What is your view on Islam um as someone who grew up in a um Muslim family?

Yousef: I was conditioned to be a Muslim later on I went to a Shar school I studied uh Islam I uh memorized huge portions of the Quran I read the Quran on regular basis I studied classic Arabic to understand the language of the Quran I spent most of my childhood and up to uh my uh mid 20s uh in that environment Islam is not a religion of Peace bottom line

so and this is not this is not according this is not according to one sect this is according to the Quran itself and all the Islamic sects uh denominations follow uh a major book and that's Quran and Quran in itself is not peaceful the god of the Quran Allah is not peaceful he's a very violent God he's not tolerant he hates the Jewish people he hates the the non-muslims and he gives the authority to the Muslims to punish the non-muslims if they don't obey Allah to function as the sword of Allah on Earth

and this by itself is blasphemous is wrong is against the way of life is against the way of evolution it's against religion it's against morality it's against diversity and uh those who claim that Islam is a religion of peace they are liars they are all paid actors they are all compromised by the sheh oil money and they don't want to piss off Islamic political regimes and Islamic money and is Muslim investors and most importantly they want to avoid the Muslim rage

so they just keep dragging Humanity into the Trap that Islam is a religion of peace it's not so as someone who know the Quran very well so the people cannot be mistaken say okay this is your Islam or this is your sect or this is your denomination I tell them rest take a seat and listen the Quran itself has a problem Allah himself has a problem and if we want to deal with the Islamic violence then we need to deal with the root cause of this problem and it resides in the Quran Itself

what about the millions of Muslims across the world who do not engage in Jihad and who are peaceful then they are not Muslims then they're just nominal Muslims they have been given the identity of a Muslim because they were born in that environment and they don't have any other identity they are just weak individuals and uh they don't practice Islam according Allah they are going to help uh but for some reason they just keep clinging and hanging on this uh identity Muslims

it's pathetic it's disgusting and they don't earn my respect to identify with something they don't understand or to identify with a Nazi ideology and pretend to be peaceful so Islam is not ethnicity it's not even a religion it's a totalitarian system and uh this system does not see anyone outside of it does not recognize anyone out of it

it's a mental illness in other words and the Muslims whether they know what Islam is or they don't know what Islam is as long as they identify with this sick ideology I consider them Psychopaths I consider them sick people and they must seek Help.

Spyrjandi: yeah there there are there are you I think you called them nominal Muslims I mean you you you put a you made a term for the millions of Muslims who are peaceful and uh I just want to point out you know not they're not they're not actors right like there are there are millions of Muslims in this world who are peaceful you can call them nominal if you want but I just think it's worth noting right isn't that an important fact I think do do you agree uh?

Yousef: No I disagree oh I disagree because in Islam and you know that I rejected Islam totally many years ago the Islamic law okay the Islamic law says and this is according Muhammad in a uh if someone uh change his religion Islam in this case give him three days if he does not return to Islam kill him so this is according to Muhammad now the founder of Islam and according the most trusted Islamic sources so now there's a test sentence to Me Against Me by this totalitarian system

now when someone identify with Islam and come and say I'm a Muslim now how am I to actually feel about him if there is a death sentence against me and against by the way many EX Muslims that we are supposed to be beheaded for just rejecting our belief system and it's delusion right so now for you you can sit you and the rest of the uh world you can sit and uh reject uh my concern uh because you are not in the fire

you there is no death penalty hanging over your head there is no price over your head you are sitting in Comfort we are fighting for our lives me and thousands of those who rejected the Islamic ideology and there are perpetrators out there who want us dead now when some uh Mustafa because he was born that way come and create a false sense that Islam is a religion of peace

they are already complicit in this crime they are already taken the side of the enemy they are already given cover to those who want to harm me and harm the rest of civilians and the rest of non-muslims across the world this is why I stand firmly and say what makes you a Muslim are you a practicing Muslim then you are a jihadist or at least you justify the Jihad if this is what you do this means that you are my enemy it's a simple as that now you tell me they are peaceful not peaceful how do I know?

Spyrjandi: Look I know these issues are are contentious and I I really hope that none of my questions are coming off silly you know when I say oh I'm curious and you're thinking Jake like you're Cur I feel like I don't want my curiosity to come off as childish I mean these are serious issues we're talking about so um so here's my thought I want I want to hear what you think about this so you're talking about Islam and you know the Quran very well

so I'm not going to dispute that so I'm I'm Jewish right I'm culturally Jewish I'm not religious but I I consider aspects of my culture i i i like there's there are elements of Judaism that I appreciate and culturally I consider myself Jewish right and a quick question for you like would you agree that Judaism is not a religion of violence like you would say Judaism is a kind religion overall would you agree

look first of all I'm not expert on Judaism that's number one yeah because here's here's what I want to say just my my one thing so in the in the Torah there are certain uh in the Jewish Bible there are certain laws that are uh they're obsolete they're considered cruel and they're no longer in practice okay so one such law is stoning for adultery it's in the Torah that adultery can be punishable by death um it's in the Torah that you can have the death panel for blasphemy and and so as a Jew I stand against all of those things and the reason I can um be Jewish and be against certain rules in the Torah is because I don't consider Judaism to be a literal like I don't I don't take the Bible literally

I don't take it literally and so I discard are the elements that I think are unethical and so I I don't mean to anger you but I I think my final question on Islam is that don't you think that in the same way that I can be Jewish and discard the immoral aspects of the Torah you can be Islam you can be Muslim rather a moderate or as you say nominal Muslim and discard the elements of the Quran which you feel are unethical is that is that a possibility?

Yousef: Okay let me ask you this so you say that it's violent because it's stoning uh uh adulterous or Those who commit adultery does it specify that they are uh to Stone the njsh I don't know also I I don't know I don't know okay does it specify that it Stones the Muslims does it mention the Muslims by name in the Torah?

Spyrjandi: I don't know or the chrans I don't know I could look it up I don't well.

Yousef: It doesn't yeah it doesn't and that's the difference in Islam. Islam they points out er a Jewish and a Christian uh population the Christians and the Jews are mentioned by name in the Quran and the Muslims are given the authority to function as the sword of Allah so the uh violent verses that you say they're coming from the Stone Age and Judaism has reformed thousands of years ago and look at Israel today it's a secular society even though there are people who believe in the Stone Age ideologies the majority of the Jewish people disagree with barbarism and savagery

now ER the Holy Scripture the Bible is not the highest authority of the state of Israel or of the Jewish people it's the uh Jewish intelligence uh that understand the essence and understand the uh distance the space and time and it's proving that the Jewish people don't practice savagery like bring me one evidence that a Jewish uh crowd or mob that stoned a woman for committing adultery in public and that was praised by by by the Jewish people it's impossible.

you cannot find any evidence of that but you will find it in Pakistan you will find it in Saudi Arabia you will find it uh in many other uh Islamic societies then uh the uh the Muslims uh

when you talk about adultery this is uh a punishment system uh that is targeting one Society it's written for the Jewish people if a Jewish person let's say sin in a certain way there's a punishment it's for the uh Community the Jewish Community it's not a law that applies for the non-jews.

So the Muslims think that they have the right to punish the non-muslims to go invade and force people to worship Allah and if they disobey uh they have the right to kill them this is what they did for uh 1400 years already and they are demonstrating that through Jihad which is a unique concept only to Islam you know there is no such thing as Jihad in in Judaism there is self-defense this is understandable the use of force is understandable but to go and try to conquer the globe and create a global Jewish State this does not exist in Judaism so I am not concerned of a scripture that was written uh from the beginning of time I am concerned of a scripture that is still active and people act on it by killing and kidnapping and justifying all type of barbarism and that's only existing in Islam and this is why we have in all this Islamic Global chaos so both cannot be compared for

## **Mosab Hassan Yousef WARNS Trump: "Ceasefire with Hamas Will DESTROY Israel!"**

<https://www.youtube.com/watch?v=mMvsZdyVlrl>

20 mín.

Stories to Inspire in USA. Speech broadcasted 10.2.2025

Mosab Hassan Yousef Speech to audience with Sarah Stern:

And even though many of us are optimistic about Trump I have to say if he dares to force Israel to cease fire for any stupid reason we must resist him I don't know what politicians have to have to compromise well first of all good evening to everyone.

Some 14 years ago when I was like a unknown rejected Black Sheep literally Black Sheep there was no Jewish community at that time there was no recognition and not many people stopped me in the street to take a photo and say you're a hero Etc there was a woman who did the right thing when I was in the face of deportation when I was forsaken by my own parents when I was doubted when I had to face all type of accusations and I could not approve my account of what I did in my secret life fighting against terrorism going against my belief system going against my entire High conditioning

the United States government wanted to deport me and a woman picked up the phone and she said I want you to come to Congress I want to honor you and I told my uh friends who the heck is this woman what she wants from me she foresaw she knew I was in trouble

she opened her house I had sleepless nights for months she opened her house she does not open her house for anybody she was very sincere and that night I remember the couple of nights and the Shabbat I spent at at their house I had the deepest sleep in a very long time this is when I came to realize the power not of a lobbyist not of a political activist on Capital Hill but the power of motherhood.

Do me a favor when this when this woman speaks put your forks down you can wait a little bit pay attention she does not speak that loud because she's very gentle but inside her she's very powerful pay attention and pay some respect please the reason I came here tonight only because of her I don't know any of you most of you I don't know

I know her we know you so please pay respect growing up in the Hamas world I want to be direct it's a death cult this is what it is I can go on and on describing what Hamas culture is what Islamic culture is which everybody is trying to silence me when I raise the case that we have an Islamic problem that on October 7 they celebrate a genocide against the Jewish people a modern day Holocaust

they celebrated it then shortly after they complained to be victims of a genocide they inverted the narrative in no time as the Jewish people still mourning October 7 total denial living in false Ood their Mastery is to invert the narrative they have been committing and I include my family that you are talking about

my biological family which something that I forgot long time ago you know imagine me and my father we had guns pointing each at each other each one of us had a bullet I did not pull

the trigger but he did 15 years ago and I still holding the bullet and I'm telling him yesterday and today drop your violence that's all you have to do drop your violence and his violence is not only against the Jewish people it's against all the non-muslims, so we are dealing with a 7th Century tribalism.

I am not here to speak low of my parents but I have no other choice after October 7 I had to draw the line I had to draw the line because all of us compromise our relationship to a certain degree that this is a father this is a mother this is a partner whatever it is out there then we end up compromising the destiny and the future of humanity.

Some of us must stand for the truth. Yes I severed I had no choice with heart broken to severe my relationship with my mother, but along the line many amazing women came into my life and Sarah Stern is one of them she literally saved my life and this what really matters it's the contrast of my childhood environment and this is why I rejected their violence there was a small crack between me and this people and it kept widening and it's still widening until today I thought after October 7 they would realize that what they did was horrible, what they did was unforgivable, what they did was a total mistake, that they would come to their senses and think and and and realize that violence is a dead end

But instead of learning, they blamed Israel and now they are blaming the United States and they blaming the entire world we cannot accept this victim mentality this victim mentality will lead Humanity to total Destruction, because a victim mentality does not take responsibility it can never uh trace the original of its suffering what they did in Gaza is their own creation and instead of admitting that what they did was wrong that they brought destruction upon themselves

they accused Israel of genocide using human Shields sacrificing children religiously and when I talk about sacrificing children people think that I'm exaggerating what can a father when he had to choose between his hypothetical entity a God Allah and his son who saved his life then he go on choosing the non-existential this is the culture that we are dealing with

and of course I'm a self-made man I'm not dependent on anybody it's too late to think actually of parents but I worry about all the children who are in that culture who have been sacrificed Hamas gambled with children's blood on October 7 knowing what Israel that Israel would have no choice but to invade Gaza

and they wanted to maximize the civilian casualty as Israel has been trying its best to minimize the civilian casualty and I know this from a firsthand experience this is not a propaganda I know if they succeed in first of all if they succeed in De delegitimizing Israel then if they succeed in destroying Israel

God forbids and we are not going to allow that to happen they will go after Christians Hindus Buddhists and all all the non-muslims and you know what's worse than this and I'm sorry for my long answer you got me emotional right now

I should not raise my voice in your presence what's worse than this after killing or and Muslims they will kill themselves this is what they approved throughout the centuries how many Islamic kills have we witnessed and as someone who studied the Islamic history they paved the path towards their Kingdom of Allah on human skulls

millions of people perished for the Islamic ambition and after they achieve their temporary goal they killed each other and *Islam* [here corrected, obvious mistake in Yousef speech] today is cut up in the Shia - Sunni War if it wasn't for Israel, Sunni and Shia would kill each other, if it wasn't for Israel the only thing that unifies.

Wat what so-called Palestinians nothing but political gangs with no legitimate leadership they never been a country they claim to be occupied it's a lie it's as simple as that and millions of people around the world are believing the lie so this is what we are dealing with.

False narrative lead eventually to violence and we must counter the false narrative with everything that we have I came from that hill this is where I came from and I don't want the practice of sacrificing children for political and financial gain to continue you.

This is my life's Mission.

And it's as simple as [Applause] that.

Sarah Stern: Mosab! do you believe that there can be a true peace between the what we call the Palestinians and Israel?

Mosab Hassan Yousef: Well first of all we have to kill so many terrorists before we get to that Point I swear you know listen I have been a yoga practitioner for almost 15 years of every everyday practice Om Shanti in the morning every morning.

I never thought I would be talking of killing people but we have no other choice when I left my peaceful Island after October 7 I left with nothing in my pocket with nothing on me and I swear that if Israel decides to let Hamas go get away with their crime that I will build an army from scratch and I will go after them until I destroy them.

What peace now? The only way towards peace is through war and we must win this war not only against Hamas but against all the Nazis around the globe who have been celebrating and rejoicing and as the Ambassador said when they tasted little bit of blood it ignited blood lust in all of them and they're coming after civilization they're coming after the successful minority they're coming after everybody and no one can satisfy their ambition first we have to seize the day we must win win the war I've been to Gaza I've been to uh the Lebanese border I've been with special forces with the Navy I count on those guys.

Here we are sitting in Comfort we have people there in Gaza our soldiers are dying on regular basis they are suffering, their families, the hostages, their families there are people who are paying very big price and we can not let them down and we cannot decide on their behalf, seize fire now it's not up to Biden it's not up to Trump and even though many of us are

optimistic about Trump I have to say if he dares to force Israel to seize fire for any stupid reason we must resist him.

I don't know what politicians have to have to compromise we cannot allow we cannot allow the Iranians the Islamic revolution to obtain a mass destruction weapon if they hit Israel God's forbid they have ballistic missiles if they have a mass destruction weapon if they hit Israel.

They don't care for Jews or sunnis they want to kill everybody they want to invade Mecca they want to kill the entire Sunni Muslim World their goal is not Jerusalem their goal is Mecca this is what shiat wants.

And I think the sunnis if they have little bit of brain they must get United with Israel against the Islamic Republic of Iran so with that said with that said we cannot let the destiny of the entire Middle East generations to come and the destiny of and the fate of the Jewish people hang on the desire of a politician.

It doesn't matter which party they belong to you know we hear so many amazing Pro promises right now but tomorrow I want to see this beautiful speeches in practice in the United Nation this is this is when this simple man may do a standing ovation but so far I haven't seen results.

What I would like to see the destruction of the head of the snake [the evil regime in Iran], the head of the snake, so peace peace will follow but do we have any other choice they pushed us to the corner

Sarah they want me to cease to exist and I don't understand why all we did we saved human lives Hamas killed Arabs Drews, Jews, Christians, foreigners, they killed civilians in discrimin imely.

And my crime I reported them my crime was to protest or to reject their death ideology hence I became a traitor this is my sin and now they want me dead, this is my crime, that I saved human lives.

And today I have so many Americans here on the American soil who have been rep in Hamas propaganda they want to make my blood allowed. My father said 14 years 14 years ago: „He's not my son if you want to kill him I will not come after you his blood is halal...” he said it in a public statement this is what he said to public and the same thing today many Americans I'm an American citizen I'm loyal to my country.

My country is the United States they want me they want me to be loyal to a colonial entity a colonial entity this is what Palestine. It was never a country it's not a it's not it was not a Sovereign Nation, it's not an ethnic group, it's not a religion, it's not a race, it was only a colonial entity and they wanted me to be violent and they wanted me to obey their violence in service of a colonial entity at the expense of humanity.

And today when I reject this they accuse me of treason and they want me to cease to exist this is where I meet with the Jewish people because I know what it really means to fight for your very existence, this is an existential fight and we must win. After we win and after I Crush their skulls okay then we can talk peace.

Sarah Stern: Okay so all of you have got to recognize And appreciate masab husan ysep was educated indoctrinated socialized to hate our people he had to penetrate through layers and layers of socialization and he drew forth this beautiful soul of humanity and every single person in this room has got to stand up and bless the day that Mosab Hassan Yousef was born thank you so much.

Yousef: Thank you very much I appreciate that. Thank [Music] you thank you so much thank you very much God bless.

## Mosab Hassan Yousef "The West Is Feeding the LIE OF PALESTINE"

[Stand Tall Israel](#)

<https://www.youtube.com/watch?v=w1Q3yEOKmfE>

15 mín

the conflict in the Middle East. Um, I personally don't think it's a political conflict. It is not a conflict over land. It's uh a lot deeper than this and it looks like many people are in denial of the origins of this conflict which is more of a spiritual a conflict of principality. A conflict and a war of narratives force narrative versus the truth. And of course the truth is a big claim. But how do we know the truth from falsehood?

You know them by their actions. You know them by their manifestation. Everyone has the equal potential given by the universe. The same soil, the same sun, the same elements. But some people create. You know them by their action, by their creation. The others sit down, wait, then blame. Then they create their own narrative, the victim narrative.

Then they believe it. Then they act on it. Then they may become violent. Then they may try to invade and dominate things that don't belong to them. It is not about the land. It's about the harvest. They prefer a developed land. You can give them all earth and they will ruin it.

Even if you give them the Palestine that they are crying about, they will not know what to do with it because they already have it. But they prove to be irresponsible. If that can if they cannot be responsible towards their own children, how can they be responsible towards others?

Then they have adapted to the human delusion. So obedient to hypothesis to entities that supposed to live on the other side of the universe. This is where their loyalty is. Their goal is in the afterlife, not in this life.

So we are talking about a human delusion to the deepest level. This is not about territory. It's not a political conflict. It's just showing you the true nature of those who choose to be suban animal So now people are screaming equal rights, equal rights. What about equal duty? What about responsibility? [Applause]

We just saw Dr. Ayel Levy. She's a mother of a 19-year-old girl who was dragged by a savage into a dark world as the entire world has been watching. No condemnation of that. They want to vi -

they want to validate rape, kidnap, looting, killing, genocide, ethnic cleansing by the name of resistance. And if we agree to that, they have been saying free free Palestine instead of saying free the hostages. [Music] 4:42

My apology for the long answer he must uh translate. But I think at least you understanding my feeling into this. [Music]

The whole world the whole world let Dr. Ayelit and Nama and the rest of the hostages down. They betrayed this handful of people represent humanity. But such cruel blind world that

instead of pressuring Hamas to free the hostages, they have been screaming out loud to free a concept against humanity against freedom itself by the name of freedom.

This is the situation that we are dealing with. This is not political. This is not a political. This phenomena now is becoming global. It's darkness is about to take over and we must counter it. We must fight against it. Whatever it takes. [Music]

Okay, this is the fun part. Now, my apology. You don't have to scream out loud. You can just be as calm as possible. Thank you. Maybe we'll get to the crux of the matter in your eye. What is Palestine? This could be the most important question of the century. If people are able to answer the question, what is Palestine? Then we will reach the root cause of this problem.

Palestine was never a country, is not a nation, is not an ethnic group, is not a religion, is an illusion. It's at best at best an ideology. An ideology that has been proven to be violent, pro-anarchy, against order, dependent on the destruction of Israel.

The same thing with Islam, an Islamic state dependent on the destruction of civilization. If we allow such concepts to manifest, this means great suffering, bloodshed, war, conflict, confusion and eventually total destruction. Palestine is a very similar to a black hole that nothing can satisfy it. today is used as a device.

They only want to take this part of the world only this for now as a first step. But they must erase the Jewish people as a condition. They must ethnically cleanse the Jewish people from the river to the sea as a condition for Palestine to exist. And if we allow them to do that, then we will allow them to do more, a lot more because tomorrow is not going to be only Palestine.

It's going to be Andalusia. Did you know that Andalusia is an Islamic land? And did you know that Spain has been occupying and the Muslims have the right to fight until the end of time until they emancipate and from Spain and Palestine from Israel. This is what's all about.

So the lie of Palestine, how it has been used as a device to manipulate, to deceive at the expense of Arab and Jewish children. But if allow we allow that to happen, the next generations will pay the price because this is going to be the birth of a savage empire. And this is what Palestine is all about. [Applause]

How do you see the future? Uh, we have two and a half minutes. It's not up to me. It's not up to you. It's up to them. Okay. The future is now. We set the foundations of tomorrow today. If today we choose to live in falsehood, this means tomorrow is going to be a distorted reality. So before we go to tomorrow, we need to solve the problem of today.

There is a vast majority in the world that they believing in a false narrative. We tell them Palestine is non-existential. It can even if it manifests, what is it going to take to manifest such violent concept, but they choose to believe in the force narrative. And we have a generation of Palestinians as a global phenomena, as a global movement.

They finally unleashed the monster where now so many people are swearing by the name of Palestine. They never been there. They don't know what stands for. They don't know that they would pay the price first and last. But they still screaming like sheep. Palestine. Palestine.

In that crowd you will find the communist, the Islamists, all type of fanatics, extreme opposites contradicting each other just like all the Palestinian political gangs by the way that they would kill each other if they did not have a common enemy, Israel.

But somehow somehow they found the common enemy, someone to blame, the most successful ethnic minority on earth with a great contribution to life, the Jewish people. They're going after the Jewish people. But what are they contributing in except violence and anarchy and chaos? And they've been swearing, globalize the antifa. Globalize the antifa. They want to bring destruction everywhere else.

This is why it's appealing to so many of those of Islamic origins here in Europe. It's a device. They have their opportunity right now to retaliate, to intimidate and they have been exploiting the freedoms of the west without believing in the western values.

So now before we talk about tomorrow, we need to be aware of this problem that we are dealing with. This is an extreme situation and we may have to do extreme measures to counter it. We need to learn. I'll try to conclude.

We need to learn from what Israel is doing. Israel had no choice but to use the force to send a very clear message to Hamas and Islamists that violence is a dead end. You initiated this war on October 7 and you initiated all the previous wars and your aggression cannot go without consequences and Israel has the right to draw the line. I have the right to draw the line. Now all those who want to validate Hamas atrocities by whatever name is they can all go to hell [Applause]

even if they are a majority. Even if they are a majority doesn't matter because we cannot allow the birth of a savage empire. We cannot allow that to happen. So before we talk about tomorrow, we need to finish this war and we need to counter this threat.

This is a threat against civilization, against humanity, against evolution, against God. Then we can talk about tomorrow. Thank you.
